

18 - 22 SEPTEMBER

How to record your karaoke?

Love Song to the Earth

Preparation for video recording

- If you would like your child to participate in the choir around the song "This is a lovesong to the Earth" which will be broadcast during the IAC2022 Paris congress and then on the congress website, here are some rules to respect:
- We will only accept children for whom we have received a parental authorization (Parent 1 and 2), attached.
- CNES makes no commitment that the submitted video will be used in the music video.
- Your child must be between 8 and 16 years old.
- It is essential that the child sings to the rhythm of the soundtrack that is provided. The music is provided in "Karaoke" mode to help with the lyrics and rhythm.
- Accepted recording formats are: .mp4 ; .m4v ; .mov
- It is essential to follow the instructions noted below.

Framing

Too far away

Too close

The child should be filmed from the front, in a close-up as above, by a camera or phone in vertical format.

No one other than the child should be visible in the shot or heard.

Dressing code

Clothing should be free of text or branding.
We would appreciate it if the children simply wore a colorful t-shirt.

Backdrop

The background must be neutral, with no furniture or knick-knacks, no text and no visible marks or copyrighted works.

Set up

X

V

The phone or camera should be placed on a stand or wedged in such a way that it does not have any parasitic movements, and in vertical format.

Set up

- The camera should be at the same height as the face, as well as the screen, that the child would look at for karaoke so that the eyes are straight.
- The screen on which he will be able to read the lyrics should be as close as possible to your lens so that the child looks straight ahead.
- **The child should have headphones or earphones to listen to the music so that only their voice is recorded on the video you send.**
- We would appreciate it if the headphones and wire were as discreet as possible (hidden by the hair for example, with the wire running behind the body rather than in front)

Say good bye

At the end of your video recording, say goodbye to us

Thank you very much for your participation!
